

Idaho

The Tech Industry's Impact in the Gem State:

\$1.74

GDP from Information Tech Sector (Billions)

732

High-Tech Sector Workers Per Billion of GSP

9.8%

High-Tech Share of Total Workforce

805

High-tech start ups

While Idaho is best known as one of the nation's leaders in agriculture, the number of high-tech companies in the state grew 61% over the past decade.¹ Agtech is a significant driver of industry and innovation in Idaho and the state ranks 10th in number of high-tech workers relative to gross state product.²

The Information Technology Council (ITI) is an international trade association and the premier global advocate for technology, representing the world's most innovative companies. For more than 100 years, ITI's members have been creating new technologies that have become a foundation for the U.S. economy and society, creating jobs and making the U.S. more innovative and competitive. The tech industry supports policies that complement these efforts by helping to increase opportunity, protect consumer privacy, make networks and devices safer, and protect our environment for future generations.
