

TECHNOLOGY'S IMPACT

Maryland

The Tech Industry's Impact in Maryland:

\$18.38

GDP from Information Tech Sector (Billions)

860

High-Tech Sector Workers Per Billion of GSP

15.2%

High-Tech Share of Total Workforce

4,054

High-tech start ups

Maryland is a national leader in technology, ranking third of any U.S. state in high-tech sector workforce. A whopping 15.2% of the state's jobs are in the tech sector and Maryland is home to multiple technology focused Fortune 500 companies. Maryland is also planning for the future of tech, investing more than \$17 billion in research and development funding, second only to California.¹

The Information Technology Council (ITI) is an international trade association and the premier global advocate for technology, representing the world's most innovative companies. For more than 100 years, ITI's members have been creating new technologies that have become a foundation for the U.S. economy and society, creating jobs and making the U.S. more innovative and competitive. The tech industry supports policies that complement these efforts by helping to increase opportunity, protect consumer privacy, make networks and devices safer, and protect our environment for future generations.
