

TECHNOLOGY'S IMPACT

Connecticut

The Tech Industry's Impact in Connecticut:

\$19.29

GDP from Information Tech Sector (Billions)

570

High-Tech Sector Workers Per Billion of GSP

10.2%

High-Tech Share of Total Workforce

2,203

High-tech start ups

Connecticut's research partnerships with top New England based universities and private companies, along with strong ties to the state's financial services industry, has resulted in a technology industry boom. Hartford ranks among the fastest-growing markets in the country for tech talent ¹ and the state is in the top 20 for high-tech share of the total workforce in the U.S. ²

The Information Technology Council (ITI) is an international trade association and the premier global advocate for technology, representing the world's most innovative companies. For more than 100 years, ITI's members have been creating new technologies that have become a foundation for the U.S. economy and society, creating jobs and making the U.S. more innovative and competitive. The tech industry supports policies that complement these efforts by helping to increase opportunity, protect consumer privacy, make networks and devices safer, and protect our environment for future generations.
