Delaware produces an impressive \$1.13 billion annual output in GDP from the information technology sector¹ and is a business friendly home to several major tech companies. Delaware's tech sector is a top employer in the state, particularly its biotech and chemical industries, and ranks 13th in high-tech share of the total workforce.²

The Information Technology Council (ITI) is an international trade association and the premier global advocate for technology, representing the world's most innovative companies. For more than 100 years, ITI's members have been creating new technologies that have become a foundation for the U.S. economy and society, creating jobs and making the U.S. more innovative and competitive. The tech industry supports policies that complement these efforts by helping to increase opportunity, protect consumer privacy, make networks and devices safer, and protect our environment for future generations.
