

Hawaii

The Tech Industry's Impact in Hawaii:

\$2.09

GDP from Information Tech Sector (Billions)

315

High-Tech Sector Workers Per Billion of GSP

5.4%

High-Tech Share of Total Workforce

504

High-tech start ups

While Hawaii is often known for its robust tourism industry, the state's tech sector has experienced significant growth, outputting over \$2 billion in GDP from the information technology sector last year.¹ The state has 10,890 jobs in the computer and math fields² and over five percent of Hawaii's total workforce is employed in the tech industry.³

The Information Technology Council (ITI) is an international trade association and the premier global advocate for technology, representing the world's most innovative companies. For more than 100 years, ITI's members have been creating new technologies that have become a foundation for the U.S. economy and society, creating jobs and making the U.S. more innovative and competitive. The tech industry supports policies that complement these efforts by helping to increase opportunity, protect consumer privacy, make networks and devices safer, and protect our environment for future generations.
