Kentucky outputs an impressive \$5.4 billion in GDP from the information tech sector¹ and employs 34,220 residents in the technology and math fields.² Louisville has seen robust tech growth in recent years and is home to roughly 2,000 technology companies.³

The Information Technology Council (ITI) is an international trade association and the premier global advocate for technology, representing the world's most innovative companies. For more than 100 years, ITI's members have been creating new technologies that have become a foundation for the U.S. economy and society, creating jobs and making the U.S. more innovative and competitive. The tech industry supports policies that complement these efforts by helping to increase opportunity, protect consumer privacy, make networks and devices safer, and protect our environment for future generations.
