

TECHNOLOGY'S IMPACT

Pennsylvania

Tech is Integral to Pennsylvania's Economic Future:

\$57.24

GDP from Information Tech Sector (Billions)

636

High-Tech Sector Workers Per Billion of GSP

9.2%

High-Tech Share of Total Workforce

5,445

High-tech start ups

As a result of Pennsylvania's strong education to industry pipeline, the state outputs over \$57 billion in GDP from the information technology sector.¹ Pennsylvania is home to 22 of the country's Fortune 500 companies, including several major tech and communications corporations.² The state is one of the nation's leaders in public research and development funding, emphasizing state leaders' beliefs that tech is the future of Pennsylvania's economy.³

The Information Technology Council (ITI) is an international trade association and the premier global advocate for technology, representing the world's most innovative companies. For more than 100 years, ITI's members have been creating new technologies that have become a foundation for the U.S. economy and society, creating jobs and making the U.S. more innovative and competitive. The tech industry supports policies that complement these efforts by helping to increase opportunity, protect consumer privacy, make networks and devices safer, and protect our environment for future generations.
